

Workshops that prepare your team for the challenges ahead.

Momentum Education has trained over 40,000+ leaders across 1,000+ organizations and schools over 19 years, with focused, practical workshops that accelerate collaboration, communication, inclusion, and resilience.

Our workshops are:

Holistic and Workshop based. All of our programs focus on Experiential Learning. Doing is better learning.

Live, Personal Instruction. Our workshops can be virtual or in-person. We've trained on 6 continents and all 50 states.

Social and Emotional Learning. Focused practice around integral skills to accelerate team communication and culture.

Immediately Useful. Teams leave with the critical skill training they need to see results.

Enriching & Engaging. We play games, work as a team, whiteboard, share out, write, meditate and walk away with stories to tell.

"This workshop was wonderful. I wish that I had more opportunities to participate in PD's that truly allow participants to really share and experience the work."

"This workshop was a breath of fresh air. It was insightful, inspiring and positive. I can apply what I learned today at work and in my personal life."

"Keep It Up! Great ice breakers, great music, GREAT ENERGY!"

"This is the best workshop I have ever attended. Thanks a lot."

"Amazing framework and amazing feedback. It really made me reflect on my process."

Our Program Menu

Uniquely tailored to radically shift your teams' communication, foster collaboration, equip social and emotional learning tools, and the refresh the way you work together.

Effective Communication + Difficult Conversations

Participants walk away with a firm understanding of theirs and others' communication profiles, how to seamlessly work with varied communicators, and the tools to create clarity, resolve conflict, and build collaboration.

Teamwork + Collaboration

Participants leave with equipment to build trust, foster collaboration, and seek out mutually beneficial solutions for themselves and their team.

Thriving During Challenging Circumstances

Participants learn how to identify internal and external patterns, shift roles from maintaining to creating, accelerate learning, reroute resistance, identify bridges and barriers, and reflect on their relationship to change.

Equity, Diversity, Inclusion + Empowerment

Participants learn key actions to reduce implicit biases and the vocabulary to create ongoing conversations across all members of your organization as they analyze, explore, and examine the unique aspects of themselves and their team to create real, structural change.

Internal Culture & Beliefs

Participants walk away from this highly-reflective and interactive workshop with a common vocabulary, clear insights into personal and organization values, and a foundation for accelerated collaboration.

Programs for Educators & Schools

We're committed to impacting the lives of **1 million students** by the end 2022

That's **1,000,000 students** that send a ripple through their 1,000,000 families, schools, and communities. 1 million of tomorrow's leaders who know the difference they make and are equipped with the tools to make that difference. See some of our offerings below:

Lead with our Leaders

Your Superintendents, Principals, Administrators, and Chairs have the deepest and most widespread impact on the organization. We see the most significant impact on groups when we begin with leadership.

Support the front-line of Educators

Your Teachers, Specialists, and Student Support are the way in which we can directly reach students. They serve as a beacon that can energize a classroom, school, and community. They require specific skills training to navigate both being a powerful leader to students while functioning as part of a cohesive team.

Equipping Students so they may be the leaders of today

Your students' success is our primary metric. Our Youth & Teen Programs, designed for ages 13-17, focus on self-leadership and individual effectiveness as well as equipping students with shared vocabulary and the tools to create meaningful impact.

Research points to the incredible amount of stress that students have been facing. Many are precariously re-entering a classroom after learning remotely, navigating hybrid coursework, and balancing life in a world where Covid-19 exists.

"When students returned to classrooms this fall, social anxiety and increased stress were predictably high. In the most recent YouthTruth survey on well-being during COVID-19, less than half of the 207,000 students polled reported feeling connected to their school community. Forty-nine percent reported feeling depressed, stressed, or anxious at a level that affects their learning."
